Thank you for purchasing a Panasonic Hybrid IP-PBX.
Please read this manual carefully before using this product and save this manual for future use.

KX-TDA50: PSMPR Software File Version 6.0000 or later
KX-TDA100/KX-TDA200: PMPR Software File Version 5.0000 or later
KX-TDA600: PLMPR Software File Version 5.0000 or later

Document Version: 2010-11
Introduction

About this Programming Manual
The PT Programming Manual is designed to serve as a reference to programming the Panasonic Hybrid IP-PBX using a Panasonic proprietary telephone (PT) with display.

The PT Programming Manual is divided into the following sections:

Section 1, Overview
Provides an overview of programming the PBX.

Section 2, PT Programming
Serves as reference operating instructions when using a display PT to program the PBX.

Section 3, Appendix
Provides a list of all related PT programming items for each feature as Feature Programming References.

References Found in the PT Programming Manual

PT Programming Manual References
Related sections of the PT Programming Manual are listed for your reference.

Feature Manual References
The Feature Manual explains what the PBX can do, as well as how to obtain the most of its many features and facilities. Sections from the Feature Manual are listed throughout the PT Programming Manual for your reference.

Links to Other Pages and Manuals
If you are viewing this manual with a PC, certain items are linked to different sections of the PT Programming Manual and other Hybrid IP-PBX manuals. Click on a link to jump to that section.
Linked items include:
• PT Programming Manual References
• Feature Manual References
Safety Notices

Please observe the safety notices in this manual in order to avoid danger to users or other people, and prevent damage to property. The notices are classified as follows, according to the severity of injury or damage:

<table>
<thead>
<tr>
<th>WARNING</th>
<th>This notice means that misuse could result in death or serious injury.</th>
</tr>
</thead>
<tbody>
<tr>
<td>CAUTION</td>
<td>This notice means that misuse could result in injury or damage to property.</td>
</tr>
</tbody>
</table>

**WARNING**

Unplug the PBX from the AC outlet if it emits smoke, an abnormal smell or makes unusual noise. These conditions can cause fire or electric shock. Confirm that smoke has stopped and contact an authorized Panasonic Factory Service Center.

**NOTES**

- The contents of this manual apply to PBXs with a certain software version, as indicated on the cover of this manual. To confirm the software version of your PBX, see [190] Main Processing (MPR) Software Version Reference.
- Some optional service cards, PTs, and features are not available in some areas. Additionally, some optional service cards and features are not available for some PBX models. Please consult your certified Panasonic dealer for more information.
- Product specifications are subject to change without notice.
- In this manual, model number suffixes (e.g., KX-TDA50G) are omitted unless necessary.

2.1.10 Resource/Interface Programming

2.1.11 SMDR & Maintenance Programming

2.1.12 Card Programming
Section 1
Overview

This section provides an overview of programming the PBX.
1.1 Introduction

1.1.1 Introduction

These programming instructions are designed to serve as an overall system programming reference for the Panasonic Hybrid IP-PBX. Each feature in the PBX has default settings that can be changed to customize the PBX to your requirements. These settings control the functions of the PBX, and changing them is referred to as "system programming".

Only one person can perform system programming at a time. Any other users trying to enter system programming mode will be denied access.

Ways to Program

There are two programming methods:

• **PC (Personal Computer) Programming**
  All features and settings of the PBX can be programmed through PC programming with Maintenance Console. Installing and starting Maintenance Console are explained in the Installation Manual.

• **PT (Proprietary Telephone) Programming**
  A subset of the features and settings of the PBX can be programmed using a PT. PT programming is described in Section 2.1 PT Programming. An extension user can perform system programming by entering three-digit programming numbers with a PT.
1.1.2 Password Security

To maintain system security, system passwords are required to access certain programming functions of the PBX. By giving different users access to different passwords, it is possible to control the amount of programming that each user is able to perform. The following types of system passwords are available:

<table>
<thead>
<tr>
<th>Password</th>
<th>Description</th>
<th>Format</th>
</tr>
</thead>
<tbody>
<tr>
<td>System Password (PT) for User</td>
<td>Used to access user-level PT programming. The specific PT programming items that may be programmed at user level can be selected through system programming.</td>
<td>4 – 10 digits</td>
</tr>
<tr>
<td>System Password (PT) for Administrator</td>
<td>Used to access administrator-level PT programming. All PT programming settings are available.</td>
<td></td>
</tr>
</tbody>
</table>

CAUTION

To the Administrator or Installer regarding the system password
1. Please provide all system passwords to the customer.
2. To avoid unauthorized access and possible abuse of the PBX, keep the passwords secret, and inform the customer of the importance of the passwords, and the possible dangers if they become known to others.
3. The PBX has default passwords preset. For security, change these passwords the first time that you program the PBX.
4. Change the passwords periodically.
5. It is strongly recommended that passwords of 10 numbers or characters be used for maximum protection against unauthorized access. For a list of numbers and characters that can be used in system passwords, refer to Section 1.1.3 Entering Characters.
6. If a system password is forgotten, it can be found by loading a backup of the system data into a PC, and checking the password using the Maintenance Console software. If you do not have a backup of the system data, you must reset the PBX to its factory defaults and reprogram it. Therefore, we strongly recommend maintaining a backup of the system data. For more information on how to back up the system data, refer to the on-line help of the Maintenance Console. However, as system passwords can be extracted from backup copies of the system data file, do not allow unauthorized access to these files.
1.1.3 Entering Characters

The following characters can be used when storing a name, message, or other text entry data using a PT. The tables below show you the characters available by pushing each button a specific number of times.

Table 1 (Standard mode)

<table>
<thead>
<tr>
<th>Times</th>
<th>Buttons</th>

<td>A</td>
<td>n</td>
<td>n</td>
</tr>
<tr>
<td>2</td>
<td>6 (5 times)</td>
<td>6 (5 times)</td>
</tr>
</tbody>
</table>

**Note**
- To erase the character on the cursor, press CLEAR.
- To move the cursor to the left, press ◀.
- To move the cursor to the right, press ▶. When entering two or more characters that use the same button consecutively (e.g. "G" and "I"), you must press this button or the FWD/DND button after entering the first character.
- If SELECT is pressed, the characters for each button will be displayed in reverse order.
- To toggle between Table 1 and Table 2 when using the KX-NT300/KX-DT300/KX-T7600 series, press the leftmost soft button.
Section 2

PT Programming

This section serves as reference operating instructions when using a display PT to program the PBX.
2.1 PT Programming

2.1.1 Programming Instructions

**Required Telephone/Extension**

PBX settings can be customized through system programming by using a proprietary telephone (PT) with a multiline display, such as the KX-NT343 or KX-DT346. To access system programming, the Class of Service (COS) assigned to the PT's extension must be programmed to allow system programming, or the PT must be connected to the lowest-numbered port on the card installed in the lowest-numbered slot. Only one system programming session can be performed at a time. This means that only one user can access system programming at a time, whether through a PT or PC. For a list of characters that can be entered during system programming, see Section 1.1.3 Entering Characters.

**Buttons and Functions**

<table>
<thead>
<tr>

### Entering System Programming Mode

Using a PT to perform system programming allows an authorized extension user to set a wide range of PBX features and parameters. There are two levels of system programming that can be performed with a PT: administrator-level programming and user-level programming.

**Administrator Level:**
Allows the programming of all settings accessible through PT programming.

![Administrator Level Programming Diagram]

**User Level:**
Allows the programming of limited settings as permitted through PC programming.

![User Level Programming Diagram]

**Note**
- ◆ means default value throughout this manual.

### Programming Structure

<td>Timer Programming</td>
<td>System timers</td>
</tr>
</tbody>
</table>
2.1.2 Maximum Values

Throughout this manual, maximum entry values are shown for each programming item. When maximum entry values for one or more of the supported PBX models differ, these differences are listed within the programming item, as shown in the example below.

These values vary by PBX model

However, please note that extension number, slot and port entry values are not listed within each programming item. These values vary depending on the model of PBX and the card type installed, as shown below.

Extension Numbers
All models: 1–5 digits

Feature Numbers
All models: 1–4 digits

KX-TDA50 Slot and Port Values

Available Slot Entry Values

<table>
<thead>
<tr>
<th>Slot Number</th>
<th>Supported Cards</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>Pre-installed Super Hybrid Ports</td>
</tr>
<tr>
<td>02–04</td>
<td>DLC4, HLC4, PLC4, LCOT4 cards</td>
</tr>
</tbody>
</table>
Slot Number | Supported Cards
---|---
05–07 | DLC8, PLC8, SLC8 cards
08–09 | DPH4 card

Enter slot numbers as two-digit numbers (e.g. "04" for slot 4).

Available Port Entry Values

<table>
<thead>
<tr>
<th>Card Type</th>
<th>Port Number</th>
<th>Related Programming</th>
</tr>
</thead>
<tbody>
<tr>
<td>DLC4</td>
<td>01–04</td>
<td></td>

<tr>
<td>LCOT4</td>
<td>01–04</td>
<td>[40x] [41x] [450]</td>
</tr>
<tr>
<td>Pre-installed Super Hybrid Ports</td>
<td>01–04</td>
<td>[600] [601]</td>
</tr>
</tbody>
</table>

Enter values as two-digit numbers (e.g. "04" for port 4).

KX-TDA100/KX-TDA200/KX-TDA600 Slot and Port Values

Available Slot Entry Values

KX-TDA100/KX-TDA200

<table>
<thead>
<tr>
<th>PBX Model</th>
<th>Slot Number</th>
<th>Supported Cards</th>
</tr>
</thead>
<tbody>
<tr>
<td>KX-TDA100</td>
<td>01–06</td>
<td>All cards</td>
</tr>
<tr>
<td>KX-TDA200</td>
<td>01–11</td>
<td></td>
</tr>
</tbody>
</table>

Enter slot numbers as two-digit numbers (e.g. "04" for slot 4).

KX-TDA600

<table>
<thead>
<tr>
<th>Slot Number</th>
<th>Supported Cards</th>
</tr>
</thead>
<tbody>
<tr>
<td>101–110</td>
<td></td>
</tr>
<tr>
<td>201–211</td>
<td>All cards</td>
</tr>
<tr>
<td>301–311</td>
<td></td>
</tr>
<tr>
<td>401–411</td>
<td></td>
</tr>
</tbody>
</table>

Enter slot numbers as three-digit numbers of the form "XYY":
- X: Shelf number (1-4)
- YY: Slot number (01-11)
Available Port Entry Values

<table>
<thead>
<tr>
<th>Card Type</th>
<th>Port Number</th>
<th>Related Programming</th>
</tr>
</thead>
<tbody>
<tr>
<td>DHLC8</td>
<td>01–08</td>
<td></td>
</tr>
<tr>
<td>DLC8</td>
<td>01–08</td>
<td>[600] [601]</td>
</tr>
<tr>
<td>DLC16</td>
<td>01–16</td>
<td></td>
</tr>
<tr>
<td>DPH4</td>
<td>11–34'1</td>
<td>[72x]</td>
</tr>
<tr>
<td>LCOT8 (KX-TDA100/ KX-TDA200 only)</td>
<td>01–08</td>
<td>[400] [409] [41x] [450]</td>
</tr>
<tr>
<td>LCOT16 (KX-TDA100/ KX-TDA200 only)</td>
<td>01–16</td>
<td></td>
</tr>
<tr>
<td>ELCOT16 (KX-TDA600 only)</td>
<td>01–16</td>
<td></td>
</tr>
</tbody>
</table>

Enter values as two-digit numbers (e.g. "04" for port 4).
'1 Enter card number and port number as single-digit numbers (e.g. "34" for card 3, port 4).

2.1.3 Basic Programming

[000] Date & Time

[001] System Speed Dialing Number

[002] System Speed Dialing Name
2.1.3 Basic Programming

[003] Extension Number

Note
- Extension numbers of PSs can be a maximum of 4 digits.
- If PC Phone, PC Console, or a CTI application is running on a PC connected to an extension whose extension number is to be programmed/modified, quit the application first.

[004] Extension Name

[005] Extension Personal Identification Number (PIN)

CAUTION
There is a risk that fraudulent telephone calls will be made if a third party discovers a personal identification number (PIN) (verification code PIN or extension PIN) of the PBX.
The cost of such calls will be billed to the owner/renter of the PBX.
To protect the PBX from this kind of fraudulent use, we strongly recommend:
a. Keeping PINs secret.
b. Selecting complex, random PINs that cannot be easily guessed.
c. Changing PINs frequently.

[006] Operator Assignment

[007] DSS Console Paired Telephone
Note
This program is only available after the port connected to the DSS Console is assigned as "DSS Console" in [601] Terminal Device Assignment.
If one or more SDN buttons have been set at the DSS Console, they must be deleted before this setting can be changed (KX-TDA100/KX-TDA200/KX-TDA600 only).

[120] Location No. Verification Code

[121] Verification Code Name

[121] Location No. Name

[122] Verification Code Personal Identification Number (PIN)

[122] Location No. PIN

CAUTION

There is a risk that fraudulent telephone calls will be made if a third party discovers a personal identification number (PIN) (verification code PIN or extension PIN) of the PBX. The cost of such calls will be billed to the owner/renter of the PBX. To protect the PBX from this kind of fraudulent use, we strongly recommend:

a. Keeping PINs secret.
b. Selecting complex, random PINs that cannot be easily guessed.
c. Changing PINs frequently.

• [811] Modem Floating Extension Number
• [812] ISDN Remote Floating Extension Number (KX-TDA100/KX-TDA200/KX-TDA600 only)

Feature Manual References
6.1.5 Floating Extension

FWD (Call Forwarding)
• [472] Extension-to-CO Line Call Duration
• [473] CO-to-CO Line Call Duration
• [504] Call Forwarding to CO Line
• [605] Call Forwarding—No Answer Time

Feature Manual References
6.1.6 FWD (Call Forwarding)

Host PBX Access Code (Access Code to the Telephone Company from a Host PBX)
• [471] Host PBX Access Code

Feature Manual References
8.1.5 Host PBX Access Code (Access Code to the Telephone Company from a Host PBX)

Hot Line
• [204] Hot Line Waiting Time
Feature Manual References

8.1.6  Hot Line

ICD Group Features

- [620] Incoming Call Distribution Group Member
- [621] Incoming Call Distribution Group Delayed Ringing
- [622] Incoming Call Distribution Group Floating Extension Number
- [623] Incoming Call Distribution Group Name
- [624] Incoming Call Distribution Group Distribution Method
- [625] Destination for Overflow Time Expiration
- [626] Overflow Time
- [627] Destination When All Busy
- [628] Queuing Call Capacity
- [629] Queuing Hurry-up Level
- [630] Queuing Time Table
- [631] Sequences in Queuing Time Table
- [632] Maximum Number of Agents

Feature Manual References

9.1.1  ICD GROUP FEATURES

ICD Group Features—Group Call Distribution

- [621] Incoming Call Distribution Group Delayed Ringing
- [624] Incoming Call Distribution Group Distribution Method
- [632] Maximum Number of Agents

Feature Manual References

9.1.2  ICD Group Features—Group Call Distribution

ICD Group Features—Outside Destinations

- [620] Incoming Call Distribution Group Member
- [621] Incoming Call Distribution Group Delayed Ringing
- [622] Incoming Call Distribution Group Floating Extension Number
- [624] Incoming Call Distribution Group Distribution Method
- [629] Queuing Hurry-up Level

Feature Manual References

9.1.4  ICD Group Features—Outside Destinations

ICD Group Features—Overflow

- [625] Destination for Overflow Time Expiration
- [626] Overflow Time
- [627] Destination When All Busy
• [628] Queuing Call Capacity
• [632] Maximum Number of Agents

Feature Manual References
9.1.5 ICD Group Features—Overflow

ICD Group Features—Queuing
• [628] Queuing Call Capacity
• [629] Queuing Hurry-up Level
• [630] Queuing Time Table
• [631] Sequences in Queuing Time Table
• [632] Maximum Number of Agents

Feature Manual References
9.1.6 ICD Group Features—Queuing

Idle Extension Hunting
• [680] Idle Extension Hunting Type
• [681] Idle Extension Hunting Group Member

Feature Manual References
9.1.9 Idle Extension Hunting

Intercept Routing
• [203] Intercept Time
• [604] Extension Intercept Destination
• [625] Destination for Overflow Time Expiration

Feature Manual References
9.1.11 Intercept Routing

Intercept Routing—No Destination
• [006] Operator Assignment

Feature Manual References
9.1.12 Intercept Routing—No Destination

Intercom Call
• [003] Extension Number
• [004] Extension Name
Feature Manual References
9.1.13 Intercom Call

Line Preference—Outgoing
• [103] Idle Line Access (Local Access)
• [500] Trunk Group Number

Feature Manual References
10.1.3 Line Preference—Outgoing

Manager Features
• [112] Manager Password
• [511] Manager Assignment

Feature Manual References
11.1.1 Manager Features

Music on Hold
• [710] Music Source Selection for BGM (with the KX-TDA50)/BGM2 (with the KX-TDA100/KX-TDA200/KX-TDA600)
• [711] Music on Hold

Feature Manual References
11.1.4 Music on Hold

OGM (Outgoing Message)
• [631] Sequences in Queuing Time Table
• [730] Outgoing Message (OGM) Floating Extension Number

Feature Manual References
12.1.2 OGM (Outgoing Message)

Operator Features
• [006] Operator Assignment

Feature Manual References
12.1.5 Operator Features
Paging

- [640] Extension User Groups of a Paging Group
- [641] External Pagers of a Paging Group

Feature Manual References
13.1.1 Paging

Paralleled Telephone

- [600] EXtra Device Port (XDP) Mode

Feature Manual References
13.1.2 Paralleled Telephone

Pause Insertion

- [416] LCOT Pause Time

Feature Manual References
13.1.4 Pause Insertion

PC Console/PC Phone

- [601] Terminal Device Assignment

Feature Manual References
13.1.5 PC Console/PC Phone

Private Network Features

- [453] DID Destination
- [500] Trunk Group Number

Feature Manual References
13.1.13 PRIVATE NETWORK FEATURES

Private Network Features—NDSS (Network Direct Station Selection)

- [511] Manager Assignment

Feature Manual References
13.1.15 Private Network Features—NDSS (Network Direct Station Selection)
Private Network Features—PS Roaming by Network ICD Group

- [620] Incoming Call Distribution Group Member
- [622] Incoming Call Distribution Group Floating Extension Number
- [624] Incoming Call Distribution Group Distribution Method

Feature Manual References
13.1.17 Private Network Features—PS Roaming by Network ICD Group

Private Network Features—QSIG—CLIP/COLP (Calling/Connected Line Identification Presentation) and CNIP/CONP (Calling/Connected Name Identification Presentation)

- [003] Extension Number
- [004] Extension Name

Feature Manual References
13.1.21 Private Network Features—QSIG—CLIP/COLP (Calling/Connected Line Identification Presentation) and CNIP/CONP (Calling/Connected Name Identification Presentation)

PS Connection

- [690] PS Registration
- [691] PS Termination
- [692] Personal Identification Number (PIN) for PS Registration

Feature Manual References
13.1.24 PS (Portable Station)

PS Directory

- [001] System Speed Dialing Number
- [002] System Speed Dialing Name
- [004] Extension Name

Feature Manual References
13.1.26 PS—Directory

PS Ring Group

- [620] Incoming Call Distribution Group Member

Feature Manual References
13.1.28 PS—Ring Group
PT Programming

- 2.1 PT Programming
- [516] Programming Mode Limitation

Feature Manual References
13.1.29 PT Programming

Redial, Last Number

- [205] Automatic Redial Repeat Times (KX-TDA100/KX-TDA200/KX-TDA600 only)

Feature Manual References
15.1.1 Redial, Last Number

SMDR (Station Message Detail Recording)

- [800] RS-232C Parameter—Baud Rate
- [800] RS-232C Parameter—Word Length
- [800] RS-232C Parameter—Parity Bit
- [800] RS-232C Parameter—Stop Bit Length
- [802] SMDR Page Length
- [803] SMDR Skip Perforation
- [804] SMDR Outgoing Call Printing
- [805] SMDR Incoming Call Printing

Feature Manual References
16.1.1 SMDR (Station Message Detail Recording)

Special Carrier Access Code

- [303] Special Carrier Access Code

Feature Manual References
16.1.2 Special Carrier Access Code

Speed Dialing, System

- [001] System Speed Dialing Number
- [002] System Speed Dialing Name
- [509] TRS Level for System Speed Dialing

Feature Manual References
16.1.4 Speed Dialing, System
TAFAS (Trunk Answer From Any Station)

- [700] External Pager Floating Extension Number

Feature Manual References
17.1.2 TAFAS (Trunk Answer From Any Station)

Tenant Service

- [001] System Speed Dialing Number
- [006] Operator Assignment
- [320] ARS Mode
- [711] Music on Hold

Feature Manual References
17.1.3 Tenant Service

Time Service

- [101] Time Service Switching Mode
- [102] Time Service Starting Time
- [514] Time Service Manual Switching

Feature Manual References
17.1.5 Time Service

TRS (Toll Restriction)

- [300] TRS Override by System Speed Dialing
- [301] TRS Denied Code
- [302] TRS Exception Code
- [501] TRS Level
- [509] TRS Level for System Speed Dialing
- [602] Class of Service

Feature Manual References
17.1.6 TRS (Toll Restriction)

Upgrading the Software

- [190] Main Processing (MPR) Software Version Reference

Feature Manual References
18.1.1 Upgrading the Software
Verification Code Entry

- [120] Verification Code
- [121] Verification Code Name
- [122] Verification Code Personal Identification Number (PIN)
- [123] Verification Code COS Number

Feature Manual References
19.1.1 Verification Code Entry

Virtual PS

- [690] PS Registration

Feature Manual References
19.1.2 Virtual PS

Voice Mail (VM) Group

- [601] Terminal Device Assignment
- [660] VM Group Floating Extension Number

Feature Manual References
19.1.3 Voice Mail (VM) Group

Voice Mail DPT (Digital) Integration

- [201] Transfer Recall Time

Feature Manual References
19.1.4 Voice Mail DPT (Digital) Integration

Walking COS

- [005] Extension Personal Identification Number (PIN)

Feature Manual References
20.1.1 Walking COS

Walking Extension

- [007] DSS Console Paired Telephone

Feature Manual References
20.1.2 Walking Extension
Wireless XDP Parallel Mode

- [515] Wireless XDP Parallel Mode for Paired Telephone

Feature Manual References

20.1.4 Wireless XDP Parallel Mode
