AutoDome Easy IP
Get networked PTZ surveillance that fits your application and budget perfectly

BOSCH
Invented for life

When a fixed minidome doesn't offer all the features you need and a traditional PTZ camera entails more security – and cost – than you want, Bosch's AutoDome Easy IP is the perfect solution. Bridging the price and feature gap between fixed minidomes and PTZ dome cameras, AutoDome Easy IP provides the coverage of a traditional PTZ dome, the superior image quality you expect from Bosch and the power of Bosch IP – in a small, cost-effective package.

Combining a high-performance pan/tilt controller, compact minidome housing, state-of-the-art autofocus zoom camera and cutting-edge IP technology, AutoDome Easy IP makes achieving effective, networked indoor PTZ surveillance simple and affordable.

AutoDome Easy IP is an ideal fit for enhancing security at many locations:

- ▶ Small retail and convenience stores
- ▶ K-12 and college campuses
- ▶ Office spaces
- ▶ Banks

AutoDome Easy IP's big benefits let you meet your surveillance needs – **without the big price:**

Discreet monitoring
AutoDome Easy IP is 70% smaller than standard PTZ domes and 20% smaller than other minidomes.

Reduced costs
AutoDome Easy IP provides as much coverage as four fixed domes, so you can monitor a larger area with fewer cameras. It incorporates Bosch's H.264 compression technology, which means you lower bandwidth and storage demands by up to 30% compared to conventional MPEG-4 IP cameras. Plus AutoDome IP lets you stream video directly to a network-attached iSCSI storage array, eliminating the need for an NVR.

The Bosch IP advantage
Advanced IP capability allows you to extend viewing and control to any location on the network.

High-quality imaging
Real-time streaming in genuine 4CIF resolution delivers large, high-quality images and preserves all important details in the scene. An advanced autofocus color camera increases monitoring range while maintaining image detail.

Durability
A ruggedized, vandal-resistant design ensures critical surveillance in the toughest environments.

Flexibility
▶ Stream high-quality H.264 images for live viewing while streaming JPEG images to a remote FTP server or handheld device using Dual Streaming.
▶ Program AutoDome Easy IP to send automatic alarm notifications via e-mail using Alarm Management.
▶ View critical areas with the touch of a button using multiple user-definable preset positions. Facilitate hands-free, automated surveillance with flexible camera tours.

Reliability
Bosch has subjected AutoDome Easy IP to the industry's most comprehensive and demanding endurance tests to ensure years of reliable operation. The camera comes standard with an industry-leading 3-year warranty.

Mounting Options

Features at a glance

Feature	Benefit
70% smaller than standard PTZ dome	Implement discreet monitoring – even in the busiest environments
100x extended zoom range	See more of the scene without sacrificing image detail
4CIF/D1 resolution	Get sharper, more detailed images that enable positive identification
Ultra-efficient H.264 video compression	Reduce bandwidth and storage needs by up to 30%
iSCSI support	Stream video directly to a network-attached iSCSI storage array and do away with an NVR
Sensitivity down to 1.3 lux	Capture clear color images despite low-light conditions
60 user-definable preset positions	Reposition the camera to monitor critical areas with one touch of a button
4 preset, 4 autopan camera tours	Experience the convenience of hands-free, automated surveillance
359˚ pan range	Monitor a larger area with fewer cameras at a lower cost
Manual pan speeds up to 120˚/sec	Accurately track fast-moving objects
Surface, recessed, wall and pipe mounting options	Mount the camera to nearly any surface to obtain the surveillance level you need
Vandal-resistant bubble and aluminum housing	Get continuous surveillance in the toughest environments
3-year warranty	Trust an industry-leading 3-year warranty
