

BUSINESS TELEPHONES

Make the most of your
communications system

Tadiran's Family of Phones

Telephones supporting both IP and digital connections

Terminals for Today and Tomorrow

Your telephone system is likely the most frequently used tool in your business, so it should provide reliability yet be flexible to evolve as your organization does. Tadiran IP and digital telephones offer more telephony features that meet the needs of today's and tomorrow's users. All the Tadiran terminals are designed to enable you to make the most of your communications system, with advanced capabilities and adjustable settings to suit your work environment. Tadiran's FlexSet telephones support both IP and Digital connections for every application and offer from 6 to 148 user-defined buttons. The optional liquid crystal display presents caller and calling-party information, and when using a FlexSet with soft-keys, the display changes to show applicable feature options for one-touch activation as well as call history. The hot-dial keypad and hands-free speaker permit fast on-hook dialing, and the highly visible message-waiting indicator announces new messages.

Variety and Flexibility

The FlexSet 120, 120D, 121S and the FlexIP are shown with the optional elevated deskstand. A mid-height deskstand which functions as a wall mount is also optional on all FlexSet series phones. The T207 and T208 phones come standard with 3-position stand which also supports wall mounting. FlexSet telephones are offered in a variety of models. The 120 is the base model. The 120D and 280D feature adjustable-angle LCD displays. The 121S, 281S and FlexSet IP have these display features plus interactive softkeys.

FlexSet Model 120

FlexSet Model 120D

Coral SeaBeam Softphone

A World of Communications for Everyday Business

With its first business telephone systems introduced in the late 1960's, Tadiran now has distribution into 41 countries. Benefiting from the advanced R&D culture of Israel, we also enjoy the economy and security of a manufacturing process that is distributed across the globe. Tadiran is known for its highly reliable and amazingly configurable systems, many still in service since the 1980's and, thanks to affordable upgrades, performing with the enhancements of today's telecommunication technologies. Tadiran is furthering its commitment to provide cost-effective systems that offer adaptability to future technologies and deep configurability to meet the needs of specific industries both large and small.
